

# The Practice of Agile Business Analysis

BPMInstitute.org<sup>SM</sup>

## Tactical and Strategic Analysis Techniques for the Agile Environment

**Participants will learn how to function tactically and strategically as an agile business analyst. Detailed work and hands-on exercises will include writing user stories, decomposing epics, analysis wall management, and practice with more techniques.**

This 2-day course on the Practice of Agile Business Analysis provides participants with practical, hands-on experience on essential agile analysis principles and techniques. It includes thought provoking exercises on a range of topics including user stories, story decomposition, story mapping, analysis wall management, and other techniques for agile with relevance to the Business Analyst.

This two-day course provides in-depth agile business analysis knowledge and skills to business analysts who wish to transition to the agile methodology. Working from the foundation given in Agile Business Analysis 101 and The Business Analyst in Agile, this class focusses on giving hands-on experience in both tactical and strategic techniques. Participants are given the skills to develop effective user stories, perform epic decomposition, map stories, and execute analysis wall management. Essential agile business analysis techniques are also included in this hands-on class along with a review of many traditional business analysis techniques. This course is equally essential for any business or IT leaders who want to improve their agile programs. This class illustrates how many of the issues that arise during agile implementation can be solved with agile business analysis.
